SCIZER Treatment

FAQ

Q What is the SCIZER advantage?

A The SCIZER, a device that melts away stubborn fat, can perform both pain-free and absolute body shaping procedures, with customized sessions that also complement wearing a compression garment for the perfect S-line contour.

Q How does the SCIZER help you lose stubborn fat?

A MFSU cartridges can non-surgically heat adipocytes in the body's subcutaneous region at 9.0mm and 13.0mm, triggering coagulative necrosis to dispose of dead fat cells through your body's natural metabolism.

Q Is the SCIZER right for me?

A If you struggle with losing stubborn fat through exercise and dieting, talk to your doctor about adding the SCIZER to your body shaping journey. It's a treatment that fits multiple body profiles, designed to mold your perfect body.

Q Why wear a compression garment after treatment?

A Do you want to undergo a faster drainage of dead fat cells after your SCIZER session? How about tightening areas that were sagging before treatment? Complement your session with a body shaper to finally achieve the S-line contour you always dreamed of.

SCIZER

The SCIZER emits powerful ultrasound energy that melts away stubborn fat on your body. **It's the non-surgical solution for a younger and slimmer body line.**

1

Even after exercise and dieting, stubborn fat can still be, well, stubborn.

2

The SCIZER's powerful ultrasound accurately targets fat on areas that concern you most.

Compression Garment

3

Wearing a **compression garment** helps to condense loosely placed fat following treatment.

4

Tightening the area treated, the garment also shapes your body for the perfect contour.
